MOBILE APP · ANDROID

Seen standing water? Report it in seconds.

Photograph a possible mosquito breeding site. A.R.I.D. checks it on your phone, marks the spot, and syncs when you're back online.

01

Snap a photo

Aim at containers, tires, drains or puddles.

02

See the risk level

The photo is checked on the device, with no internet needed.

03

Save and sync

Reports are saved offline and uploaded when a connection returns.

▲ High risk ◆ Moderate ● Non-breeding

Screens show sample data. Results should be verified in the field.
